

WRGM Public File Documents

During the current WRGM license term, all required documents have been posted in the station's public inspection file, either on paper or online as applicable, in a timely manner, with one exception. That exception is that the 2017-18 EEO Public File Report, the first required to be initially posted in the online public file, was posted on June 5, 2018, four calendar days and only two business day after the deadline. The very slight delay was the result of an inadvertent oversight.
