

Request for Special Temporary Authority

Nashville License Holdings, LLC (“Lambert”), licensee of WNAB(DT), Nashville, Tennessee, herein requests Special Temporary Authority as necessary to allow its current ATSC 1.0 programming streams to be hosted on other stations in the Nashville, Tennessee market.

WNAB(DT) plans to commence ATSC 3.0 operations from its current facility. The station will serve as an ATSC 3.0 lighthouse station and will transmit ATSC 3.0 programming streams for other in-market stations as well as for itself. To ensure that viewers continue to receive all current WNAB(DT) programming in ATSC 1.0, the station plans to transition its current primary ATSC 1.0 – 30.3 CW programming to WKRN(TV), which is owned by Nexstar Media Group, Inc. (“Nexstar”). The stream will retain its PSIP 58.1 virtual channel number pursuant to Annex B.1.7 of ATSC A/321:2016 (as incorporated in the Commission’s rules in Section 73.8000).

Additionally, in order to ensure no loss of over-the-air programming to the general public, Lambert will transition WNAB(DT)’s three secondary/multicast program streams to another station in the market and will maintain the PSIP virtual channels for those streams pursuant to Annex B.1.7 of ATSC A/321:2016 (as incorporated in the Commission’s rules in Section 73.8000). Specifically, Lambert will move WNAB(DT)’s ATSC 1.0 subchannels – 30.4 Stadium, 30.5 Charge! and 30.6 Dabl – to WTVF(DT), Nashville, Tennessee, which is owned by Scripps Broadcasting Holdings LLC. WTVF(DT) will accommodate WNAB(DT)’s three ATSC 1.0 programming streams along with WTVF(DT)’s existing ATSC 1.0 primary and secondary multicast program streams. For clarity, WNAB(DT)’s multicast channels will be hosted in 1.0 as follows:

Network	RF Channel of 1.0 Host(s)	Virtual Channel (No Change)
Stadium	36.6	58.2
Charge!	36.7	58.3
Dabl	36.8	58.4

To the extent necessary, Lambert respectfully requests Special Temporary Authority to move its ATSC 1.0 channel streams to host stations as described above.

Lambert also requests that the virtual channel mapping for the WNAB(DT) ATSC 1.0 channel streams as described above appear on the face of any license(s) issued based on the instant application.
