

## STATION WMPA(FM), FERRYSBURG, MICHIGAN

As of this date, documents required to be uploaded to the WMPA(FM) public inspection file have been added to the station's online public file. However, a number of documents, including, but not limited to, some Issues/Programs Lists, and annual EEO Public File Reports were not timely uploaded.

While the station's older Issues/Programs Lists and EEO Reports had previously been placed in the station's paper public file as they became due, some but not all of these historic documents were uploaded in a timely manner when the station's public file was transferred online in early 2018. The failure to upload some of these and other documents on time was due at various times to lack of sufficient understanding of how to navigate the online public file site and the need to determine the extent of historic materials required to be uploaded. A few times the staff uploaded, realized something was missing or incorrect and had to upload again. However, corrective procedures have since been adopted to attempt to ensure that future public file documents are uploaded on time. Such corrective measures include certain staff members' supervision of the preparation and uploading of public file postings with the assistance of counsel to monitor the timeliness of such postings.
