

**ONLINE PUBLIC INSPECTION FILE**

**Issues/Programs Lists**

The station fully complied with the Commission's rules regarding issues programming throughout the license term and timely prepared quarterly Issues/Programs Reports. However, in preparation for the filing of its license renewal application, the station discovered that certain of its Issues/Programs Reports had not been timely uploaded to its online public inspection file due to administrative oversight. The station will ensure Issues/Programs Reports are timely uploaded going forward. In addition, the station discovered that it had inadvertently failed to upload its Issues/Programs Reports for Q1 2015, Q2 2018, Q3 2018, Q4 2018 and Q1 2019. The station uploaded the omitted reports upon discovering the error.

**EEO Reports**

The station fully complied with the Commission's rules regarding Equal Employment Opportunity throughout the license term and timely prepared annual EEO Public File Reports. However, in preparation for the filing of its license renewal, the station discovered that it had not prepared EEO Public File Reports for 2013, 2017 and 2018 due to administrative oversight. In addition, the station discovered that it had not filed an EEO Form 397 Mid-Term Report in June of 2016. The licensee of the station recently restructured its station employment units, in part to ensure that all EEO Public File Reports are timely prepared and uploaded going forward.
