

ENGINEER'S STATEMENT

In response to item 3 of the special operating conditions, W273DW will be using an existing Jampro JLPC-4 4 bay FM antenna with isocoupler mounted on the WYLS-AM tower. This antenna was recently vacated by W265BO and W273DW will be the only station using this FM antenna. No changes have been made to the WYLS-AM tower either physically or electrically. Therefore impedance measurements and the filing of form 302-A are unnecessary.

Thomas B. Jones, III
FCC: PG-6-8609 SBE: CPBE

The purpose of this application was to change the channel of the translator from 273 to 272. There were no changes to the antenna system or transmission line installed on the AM tower. Therefore impedance measurements and the filing of FORM 302-AM, Return to Direct Measurement was not necessary
