WUIS(FM), Springfield, IL

Online Public Inspection File

The University of Illinois at Springfield, licensee of noncommercial educational radio station WUIS(FM), Springfield, Illinois, reports the following with regard to the timely placement of items into the station's online public inspection file. Although the WUIS online public inspection file is now complete, two items were uploaded late to the file during the current license term: specifically, the station discovered that its 2017-18 and 2018-19 annual EEO reports were not added to the public file as of their deadlines; in addition, while some earlier annual EEO reports and quarterly issues and programs lists were added to the paper public file when due, they were not transferred to the online public file as of the March 2018 transition deadline due to an oversight. Notably, the station has now moved each of these items into the online public inspection file as required. The station regrets the delay in the appearance of these reports in the online public inspection file due. However, the station has already ensured that its online public file is now complete with all required materials and is taking steps internally to prevent future issues.
