

### **Reason for Amendment**

The Station's Children's Television Programming Report for 2019 was timely filed by the applicable deadline, and it is being amended to correct certain mistakes in the Report as initially filed. The initial Report identified the incorrect safe harbor compliance category and incorrectly calculated the data in the Digital Core Programming and Digital Core Programs sections. In some cases, the "age range of target child audience" as reported in the Digital Core Programs section was also incorrectly reported. The Report has now been corrected to address these errors. There are no other changes.
