

Special Temporary Authority

KUPN Licensee, LLC (“Licensee”), licensee of KVCW(TV), Las Vegas, Nevada (Facility ID: 10195; RF Channel 29), hereby requests Special Temporary Authority, to the extent necessary, to allow KVCW(TV) to simulcast its multicast streams’ ATSC 1.0 signals on different host stations than its primary stream’s ATSC 1.0 simulcast host, in connection with KVCW’s transition to the ATSC 3.0 broadcast transmission standard.

As indicated in KVCW’s Form 2100 application (*see* File No. 0000112811), Licensee proposes to (1) commence ATSC 3.0 operations from KVCW’s current facility and (2) simulcast its primary stream (affiliated with the *CW Network*) in ATSC 1.0 format on **KTNV-TV, Las Vegas Nevada** (Facility ID 74100; RF Channel 13) pursuant to a written simulcast agreement with Scripps Broadcasting Holdings LLC.

To ensure that the transition to ATSC 3.0 will not result in any loss of over-the-air programming to viewers, Licensee hereby identifies two additional host stations licensed to the Las Vegas, Nevada market that it proposes to use to simulcast the programming currently airing on KVCW’s multicast streams in ATSC 1.0 format:

- (1) Commonly owned **KSNV(TV), Las Vegas, Nevada** (Facility ID 10179; RF Channel 22) will simulcast KVCW’s *MyNetwork* stream.
- (2) **KLAS-TV, Las Vegas, Nevada** (Facility ID 35042; RF Channel 7), licensed to Nexstar Broadcasting, Inc., will simulcast KVCW’s *TBD*, *This TV*, and *Comet TV* streams pursuant to written simulcast agreement.

The PSIP virtual channels for each of KVCW’s program streams will remain unchanged. Accordingly, KVCW’s streams will be hosted in ATSC 1.0 as follows:

Network	RF Channel of 1.0 Host(s)	PSIP Virtual Channel (No Change)
CW Network (Primary)	13	33.1
MyNetwork	22	33.2
TBD	7	33.3
This TV	7	33.4
Comet TV	7	33.5

Licensee provided notice to the relevant MVPDs of its proposed multicast ATSC 1.0 signal relocations when it provided the requisite 120-day notice regarding relocation of the KVCW's primary stream ATSC 1.0 signal. During the 30 days leading up to the proposed transition date, Licensee is also airing consumer notices beyond what is required under the FCC's rules and providing additional notice on KVCW's website.

To the extent necessary, Licensee respectfully requests Special Temporary Authority to relocate KVCW's multicast programming streams' ATSC 1.0 signals in accordance with the simulcast arrangements described herein. Licensee also respectfully requests that the virtual channel mapping for KVCW, as noted above, appear on any license(s) granted in connection with KVCW's ATSC 3.0 application and this STA request. Grant of this request will serve the public interest, as it will advance the Commission's ATSC 3.0 policy goals while preserving KVCW's ability to air each of its programming streams in the ATSC 1.0 format to ensure that all over-the-air viewers can continue to receive the programming currently available to them.
