

Notification of Temporary Silent Status

WAOW-WYOW License, LLC (the “Licensee”), licensee and permittee of WMOW, Crandon, Wisconsin (Fac. ID No. 81503), hereby notifies the Commission that WMOW will be silent for a period of approximately three weeks beginning on July 3, 2020.

More specifically, as the Licensee has previously advised the Commission (*see, e.g.*, LMS File No. [0000107818](#), CP Extension Application), the transition plan for WMOW calls for the station to terminate its pre-transition channel 12 operations on July 3, 2020, at which time the station will be silent. The next—and final—stage of WMOW’s repack construction calls for the stripping of the tower and replacement of the antenna and transmission line. During that time, the transmitter building (which is too small to fit both the pre-transition and post-transition transmitters) will also be gutted and the new, post-transition transmitter will be installed. During the period of silence, the station’s programming will be available on two other co-owned stations in the same market as WMOW. The Licensee expects this work to take more than two weeks but less than 30 days. In the event the station remains silent beyond 30 days, the Licensee will file an STA request for continued silent authority.
