

## **Consolidated Engineering Exhibit**

### **WMDA-LP Minor Modification**

WMDA-LP seeks authorization to relocate 480 meters ENE of its present location.

No second-adjacent waivers are required, as the channel is fully-spaced toward all second-adjacent stations.

The current and proposed locations are short spaced to three stations. This relocation does not reduce either short spacing, qualifying this is a minor modification according to 73.807(d).

Short-spaced Station	Current Spacing (km)	Proposed Spacing (km)
K227DM	19	19
WTNM	65	66
W229CT	20	20
