

In connection with preparing to submit its license renewal application, Licensee found that in limited instances certain documents were missing from the online public file or were not uploaded in a timely manner. For certain documents, however, the “date uploaded” in Licensee’s online public file does not reflect the actual date when the document initially was uploaded. For example, while the “date uploaded” for Licensee’s 1Q 2018 Quarterly Issues Programs List is listed as April 23, 2018, but in fact that report was uploaded timely but was later moved to a different folder, which resulted in a changed “upload date.” Many documents were re-uploaded on April 23, 2018.

Some documents in the station’s political file were not uploaded in a timely manner as set forth in 47 C.F.R. §§73.3526 and 73.1943 of the FCC’s rules. In addition, the licensee has made diligent efforts, in certain situations, some information required under the rules was omitted.

Licensee takes its obligations very seriously and will adopt further procedures to remind the responsible station employees of the FCC’s requirements. By these procedures, Licensee seeks to assure that required documentation will contain all appropriate information and will be placed in the online public file in a timely manner. In addition, where applicable, Licensee is working to upload any public file documents that may have been omitted or that otherwise require updating.
