**Subject:** 0000089019 - Interference

Good afternoon,

In evaluating 0000089019, I found that it did not pass in TVStudy. Checking the engineering statement, it specified use of the 2 km cell size. However, that cell size is not permitted for LPTV or Class A stations.

You have 30 days to amend your application to eliminate the interference or the application will be dismissed.
