**City of License:** Greenfield, MA  
**Channel:** CH252A (98.3 MHz)  
**File No:** LMS-0000116550  
**Facility ID:** 25833  
**Applicant:** Saga Communications of New England, LLC

## **Explanation of FM License to Cover Filing and Compliance with Special Operating Conditions or Restrictions**

1. The applicant certifies coordination with other users of the site to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
2. The applicant certifies that before program tests commence, sufficient measurements have been made establishing that the operation authorized in this construction permit is in compliance with the spurious emissions requirements of 47 C.F.R. Sections 73.317(b) through 73.317(d). All measurements have been made with all stations simultaneously utilizing the shared antenna. These measurements have been submitted to the Commission along with this FCC Application for License. (see attached Spurious Emissions Study)
3. The applicant acknowledges it previously specified use of an ERI Model LPX-3E-SP (EPA Type 3 - Opposed "U" dipole), three section transmitting antenna with full wavelength bay spacing to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines. As no other type or size of antenna has been used with the facilities authorized herein, the automatic program test provisions of 47 C.F.R. Section 73.1620 continue to apply. In this case, no formal request for Program Test Authority need be filed in conjunction with this FCC License to Cover Application, nor are any further RF field showings required.
