APPLICATION FOR LICENSE

The following engineering statement has been prepared for **Digital Networks-Southeast, LLC** ("Southeast"), licensee of digital low power television station WPYM-LD at Cleveland, Mississippi, and is in support of their application for license.¹ This application seeks to cover the construction permit for the facility under LMS File No. 0000116415. In addition, this application will also seek to change the community of license to Little Rock, Arkansas.

Under the referenced construction permit, WPYM-LD is authorized to operate on television channel 16 with a maximum effective radiated power of 2.5 kW at a center of radiation of 96.7 meters above mean sea level, 42.7 meters above ground level, utilizing a composite directional antenna. This antenna is comprised of two Kathrein-Scala PR-TV antennas. One of these antennas is oriented at 80 degrees true, with the other at 265 degrees true. Equal power division is employed between the four elements. Southeast has completed construction of the facility utilizing the authorized parameters. The installed equipment achieves the authorized effective radiated power.

The construction permit, as issued by the Commission, lists one special condition or restriction. This condition advises Southeast that the authorization is a Low Power Television authorization, and as such, is secondary. Southeast is cognizant of the interference requirements imposed on it by the authorization, and will comply, as necessary.

¹ The Facility ID for WPYM-LD is 129503.

Southeast certifies that it will protect workers and other personnel from being exposed to levels of radiofrequency radiation in excess of the applicable safety standards, and will coordinate with all other users of the site. Coordination efforts will include, but are not necessarily limited to a reduction in transmitter power or cessation of operation.
