

Amendment Exhibit

The Licensee submits this Amendment Exhibit to accompany the amendment of its pending license renewal application originally filed May 29, 2020. The licensee hereby amends its license renewal application as described below. Except as amended hereby, the Exhibit filed with the original renewal application otherwise remains effective and is incorporated by this reference.

Online Public Inspection File

The Licensee failed to upload to the online public inspection file the certificate of broadcast of post-filing announcements concerning its license renewal application by the applicable deadline of August 24, 2020, as required by 47 C.F.R. § 73.3526(e)(13) and § 73.3580. Rather, the certificate of broadcast was uploaded on September 3, 2020, ten days late. The reason for the late upload was because the station inadvertently failed to schedule and air the post-filing announcements on the dates and times required by § 73.3580. Upon realization of the omission on August 24, 2020, the Licensee immediately scheduled the announcements to run multiple times per day, including during the hours required by Section 73.3580, starting August 24, and through August 31, 2020. In total, 54 post-filing announcements aired during this period, well more than required by Section 73.3580. Upon completion of the substitute announcements the Licensee uploaded a certificate of broadcast within 3 days. The Licensee respectfully submits that the timing of the post-filing announcements did not prejudice any member of the public who would have been well-informed of the license renewal application filing in advance of the September 1, 2020, petition to deny deadline. The Licensee respectfully submits that the error described herein is not material to its overall compliance with 47 C.F.R. § 73.3526.
