

73.1690 Exhibit to Amendment of Modification of License Application

We request for an adjustment of antenna and tower elevation and location parameters to match those of other co-owned stations sharing this antenna.

As these parameters are not available to the applicant in the LMS system we ask the staff issue the station authorization as follows:

We request a correction of the tower ground elevation AMSL of 867 meters.

We request a correction of the Height Above Average Terrain to 696 meters.

We request a correction of the overall tower height to 95 meters.

We request a correction of Radiation Center Above Mean Sea Level to 930 meters

For station **KBKS-FM** only we request correction of the antenna site coordinates to match those of the underlying ASR to 47-30-16.7 N and 121-58-7.8 W.
