

## **NONIONIZING RADIATION COMPLIANCE**

**David Ingles Ministries Church Inc.**

**FM Translator Station K229AE (Springfield, MO)**

This engineering statement has been prepared on behalf of David Ingles Ministries Church Inc. It addresses the nonionizing radiation exposure issues associated with the Environmental Effects certification on FCC Form 303-S for the license renewal application for the following FM translator station:

K229AE (Springfield, MO) – BRFT-20120921ADX

A detailed review found that the nonionizing radiation certification included in the above referenced license renewal application remains valid since there haven't been any subsequent changes in the vicinity of the transmitter site which would adversely impact this certification.
