

Adherence to Operating Parameters

The Licensee has certified in the affirmative to the question asking whether during the preceding license term, the station has operated pursuant to authorized operating parameters, either pursuant to the terms of its license, special temporary authority, or as otherwise permitted under the Commission's rules. The Licensee submits this explanatory exhibit to address the following circumstance.

The Licensee holds an authorization for a Digital Replacement Translator (DRT) for WESH operating in Orange City, Florida. A minor modification construction permit application for WESH's DRT was filed and, on August 23, 2019, granted in LMS File No. [0000080453](#). The Licensee completed construction of the modified DRT facility on or about December 19, 2019, and began operating the DRT at the authorized modified parameters shortly thereafter. Promptly upon discovery that a license to cover was required and had not yet been filed, the Licensee filed a license to cover application on September 11, 2020, in LMS File No. [0000121420](#) (granted September 21, 2020). In all cases, the DRT adhered to authorized operating parameters, but, in this case, the license to cover application was filed late.
