

Online Public File Exhibit

In preparation for license renewal, the licensee reviewed its public file and noticed a few discrepancies. Due to a misunderstanding of how to determine a station employment unit, the licensee uploaded some EEO reports late. KGYM is part of a station employment unit with KZIA and, together with that station, complied with the EEO rules. EEO reports documenting both stations' EEO efforts were, at all pertinent times, available in KZIA's public file. While all orders for political time were uploaded to the online public file in substantial compliance with the political rules, it appears that documentation after the schedules ran showing the exact times that political spots aired was not timely uploaded, but that documentation has since been uploaded and will be uploaded promptly going forward.
