

Certification Regarding Children's Television Programming Reports
During the Preceding License Term

For the period of time covered by this application, the Applicant timely filed with the Commission all required Children's Television Programming Reports. However, in the Children's Television Programming Reports for the Third Quarter of 2018 and First Quarter of 2019, Applicant inadvertently omitted program descriptions for certain core programs that the station aired. All other program information was provided. Because LMS no longer accepts amendments to quarterly reports following the Commission's transition to annual reports, and consistent with the Form 303-S instructions, Applicant has provided the program descriptions in an explanatory document that has been uploaded to the station's Public Inspection File.
