Public Inspection File

As of the date of this renewal of license application, licensee believes that all documents required to be uploaded to the station's public inspection file have been added thereto. While the licensee believes it substantially complied with the public inspection file rule during the license term, a small number of documents were uploaded after the applicable deadlines. Specifically, issues and programs lists and documentation regarding the station's Class A eligibility for 2013 and the first quarter of 2014 were uploaded in September of 2017. Due to technical problems with its transmitter, the station was off-air during most of 2013, and inadvertently failed to upload these documents covering the periods the station was silent. Similarly, the station did not upload separate documentation regarding compliance with the commercial limits in children's programming covering these periods of silence.
