

Request for Second Waiver of Tolling Standard to Extend Construction Permits

Window to the World Communications, Inc., licensee of noncommercial educational TV station WTTW, Chicago, Illinois, ("WTTW") respectfully request a second waiver of the tolling standard set forth at Section 73.3598(b) of the rules of the Federal Communications Commission ("FCC" or "Commission") as well as reinstatement of the constructions permit, for the repack construction permit for WTTW, which broadcasts from the Willis Tower in Chicago.

Previously, WTTW obtained a waiver of the FCC's tolling standard to extend the post-auction CPs for WTTW based upon a demonstration that special, rare and exception circumstances precluded construction of WTTW's post-auction facilities. WTTW's CPs expired on an **October 13, 2020**.

WTTW permanent post auction CP facilities are subject to the same special, rare and exceptional circumstances as WLS Television, Inc., Fox Television Stations, LLC, NBC Telemundo License LLC, and Unimas Chicago LLC (the "Chicago Broadcasters") as the Chicago Broadcasters are also on the Willis Tower. See attached for the detailed explanation of the complex issues and coordination required for the new TV broadcast antennas to be mounted on the Willis Tower. See Chicago Broadcasters Attachment, as taken from FCC public records.

WTTW therefore seeks tolling of its repack construction permit, as the factual circumstances so eloquently described by the Chicago Broadcasters also apply to WTTW. In addition, WTTW seeks reinstatement of its repack construction permit, which was inadvertently allowed to lapse due to a miscommunication.
