

WCBW-FM, East St. Louis, Illinois (Fac. Id. 83448)
Minor Modification Application

Request for Expedited Treatment

WCBW-FM respectfully requests expedited treatment for this minor modification application. The station lost its tower rights at its licensed location in late 2019 and after significant efforts to find a new location, and delays encountered due to the COVID-19 pandemic, it has finally executed a lease for a new transmitter site and now seeks this modified construction permit so that it can restore station operations by November 24, 2020 to avoid automatic forfeiture of the station authorization. With an expedited grant of this application, WCBW-FM will be able to schedule and complete construction. The public interest will be served by the restoration of a broadcast media voice in this community.
