

TV Station KVIE • Channel 9 • Sacramento, California

Environmental Exhibit

The transmission site is located in an agricultural area with a secured fence restricting access to the tower. Only trained authorized personnel can access the tower. At such times, power is either reduced or transmission is stopped, depending on the nature of the work. An environmental assessment is not required, as grant of this request would not be considered a major environmental action. The maximum calculated power density at 2 meters above ground and at any nearby buildings was found to be less than 5% of the applicable public exposure limit. The proposed operation is therefore categorically excluded under Section 1.1307(b)(3) of the FCC rules from having to consider the contributions of other stations at the site. None of the other factors specified in Section 1.1307 of the Rules are believed to apply.
