

Online Public File Exhibit

Dickinson-Belfield Broadcasting Corporation has been the licensee of the station and responsible for its online public file since March 21, 2017 (FCC File No. BALH-20160223ABF, granted December 23, 2016, consummated March 21, 2017). In the course of preparing the instant renewal application, licensee reviewed its online public file and discovered some discrepancies. Though all Quarterly Issues/Programs Lists were uploaded to the public file, several were not timely transferred from the paper public file to the online public file and some were uploaded late. Licensee's efforts to take corrective actions were delayed due to a COVID-19 outbreak at the station that handles the business matters, including the public file, for licensee. Licensee will work to ensure that all public file items are timely uploaded going forward.
