

Online Public File Exhibit

In the course of preparing the instant renewal application, licensee reviewed its online public file and discovered some discrepancies. Though Quarterly Issues/Programs Lists were uploaded to the public file, some Lists were uploaded late. Other I/P Lists that were not transferred from the paper public file to the online public file will be uploaded soon. Licensee's efforts to correct these issues before filing this application were frustrated by a COVID-19 outbreak at the station that caused the entire administrative staff to vacate the station and isolate due to positive diagnoses. Licensee will amend this application when all remaining documents have been uploaded and will work to ensure that all public file items are timely uploaded going forward. While licensee uploaded political documents, it discovered that some political files were uploaded late, though in some cases by only a handful of days. Due to a misunderstanding of the online public file requirements, all EEO reports were uploaded to the public file but not timely, though the station complied with the EEO rules throughout the license term.
