

K24FH-D Request for STA to Remain Silent

On September 10, 2020, Oregon Public Broadcasting first discovered that a wildfire had swept through the Glide communications site forcing K24FH-D, Glide, Etc., OR (Facility ID No. 50585) off the air. Station engineers are currently working to repair the damaged cabling and to restore K24FH-D to air at the temporary parameters specified in the current Technical STA (LMS File No. 0001055685, as extended by LMS File No. 0000120540). Oregon Public Broadcasting acknowledges that this STA request was not filed timely, which was caused by an administrative oversight.
