

Environmental Effects

Educational Media Foundation (“EMF”) certifies that KKRD complies with the maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments.

The RF worksheet in the Instructions to form 303-S was unusable to determine compliance for this facility because KKRD is located atop a building. KKRD is collocated with another FM facility on this rooftop, K288FX. RF Measurements were done upon installation and licensing of KKRD and K288FX. No areas on the rooftop were measured to be over 100% of the uncontrolled limits. No changes to KKRD or K288FX have taken place since the measurements were done. No additional facilities have been added to this building rooftop since the measurements were done.

Therefore, KKRD fully complies with the FCC’s maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments.
