

**Eligible Entity Exhibit**

The applicant is submitting this exhibit in connection with the eligible entity certification made in the Attributable Interest section of the application.

Because the nature of this application is to downgrade the existing facility WKEY-FM from C2 to C3, we believe that an “eligible entity” analysis is not germane to the application. As such, the applicant has responded in the negative to the eligible entity certification and by this exhibit specifically reserves the right in the future to claim (and demonstrate) “eligible entity” status in one or more FCC applications where such status would be relevant and warranted.
