

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of TCT OF MICHIGAN, INC., licensee of digital Low Power Television Station WJGP-LD, Channel 26 in Kalamazoo, Michigan, in support of its Application for License, which authorizes operation on Channel 25 under Construction Permit LMS-0000054651. The purpose of this exhibit is to note that an elliptically-polarized version of the authorized horizontally-polarized antenna was installed. No change in site location, horizontal effective radiated power, antenna azimuth pattern or antenna height is proposed herein.

Instead of the horizontally-polarized ERI AL8OC-25-H omnidirectional 8-bay slotted-cylinder antenna authorized in LMS-0000054651, the permittee has chosen instead to install an elliptically-polarized ERI AL8-25-E 8-bay slotted cylinder omnidirectional antenna. The electrical beam tilt value of 1.75 degrees remains unchanged.

It is respectfully requested that the Commission note these changes (antenna model and elliptical polarization) on the WJGP-LD license.

I declare under penalty of perjury that the foregoing statements are true and correct to the best of my knowledge and belief.

A handwritten signature in blue ink, appearing to read 'K. T. Fisher', with a stylized flourish at the end.

KEVIN T. FISHER
