

Antenna Change Statement

The purpose of this exhibit is to note that a different antenna from that authorized in the WRCX Ch. 9 Construction Permit (LMS-0000054778) was installed. Rather than the authorized DIE THV-5A9- RC170 horizontally-polarized antenna with an electrical beam tilt of 1.5 degrees, the permittee elected to install a PAM PA31-SDP-1X2 horizontally polarized antenna with no electrical beam tilt.

No change was made in site location, horizontal effective radiated power, antenna azimuth pattern or antenna height.

It is respectfully requested that the Commission note these changes (antenna model and electrical beam tilt) on the WRCX-LD CH.9 license.
