BASIS FOR STA

WGSC-CD operates a shared facility with sister station WGSI-CD (Facility ID 4350), Murrells Inlet, SC. Due to storm damage from several recent storms in the area of the Station's city of license, the main transmission line was separated from the tower when the support brackets broke.

This resulted in the power divider moving which damaged some of the jumpers going to the antennas. This in turn caused a bad VSWR.

Due to the bad jumpers the stations have been operating at 30% of authorized power since 11/13/2020. Licensee inadvertently failed to timely file for authority to operate at variance within 30-days. This STA request is being filed immediately to remedy this oversight.

In order to resolve the issue, new jumpers must be ordered and installed.
