

KNIN (9.4 – Circle)
Boise, ID

Xploration: Awesome Planet airing on Circle (9.4) on Sunday, November 8, 2020 did not include the E/I bug due to a technical error that stemmed from the Circle Network, but the network aired a second run of the same episode within the proscribed seven day period on Sunday, November 15, 2020 which included the E/I bug. This is why Q4 has one additional run (7 hours) of Xploration: Awesome Planet. Due to the technical nature of the E/I bug issue, the station was not able to promote the November 15th second-run during the episode on November 8th, but the Circle Network aired a promotion during its regularly scheduled children's programming block on November 15th. KNIN has taken additional steps to work with Circle Network to ensure that all episodes include the E/I bug as is required.
