

Application for Minor Change
Translator Station W299CP Assumption, IL
FCC Facility ID 200237

TECHNICAL EXHIBITS

This technical exhibit is prepared on behalf of Kaskaskia Broadcasting, Inc., Licensee of Translator Station W299CP Assumption IL. This instant application requests a minor change of the translator to a first adjacent channel, with a slight modification of the antenna azimuth and an increase of Effective Radiated Power on the licensed location. The station will continue service to rebroadcast co-owned primary station WTIM (AM).

OVERLAP REQUIREMENTS

The attached Map of Contours depicts the proposed allocation situation with respect to all pertinent co and adjacent facilities. All facilities have been depicted utilizing either the maximum ERP or directional pattern data as on file with the commission and 1 degree radial intervals on close in contours in the interest of accuracy. AAT data for the proposed facility was derived from the FCC's 30 second database, *Comstudy*.

As seen on the attached Channel Study Data Chart, channel 300-D is operable at the proposed location with no interference caused to any facility in the allocation landscape.

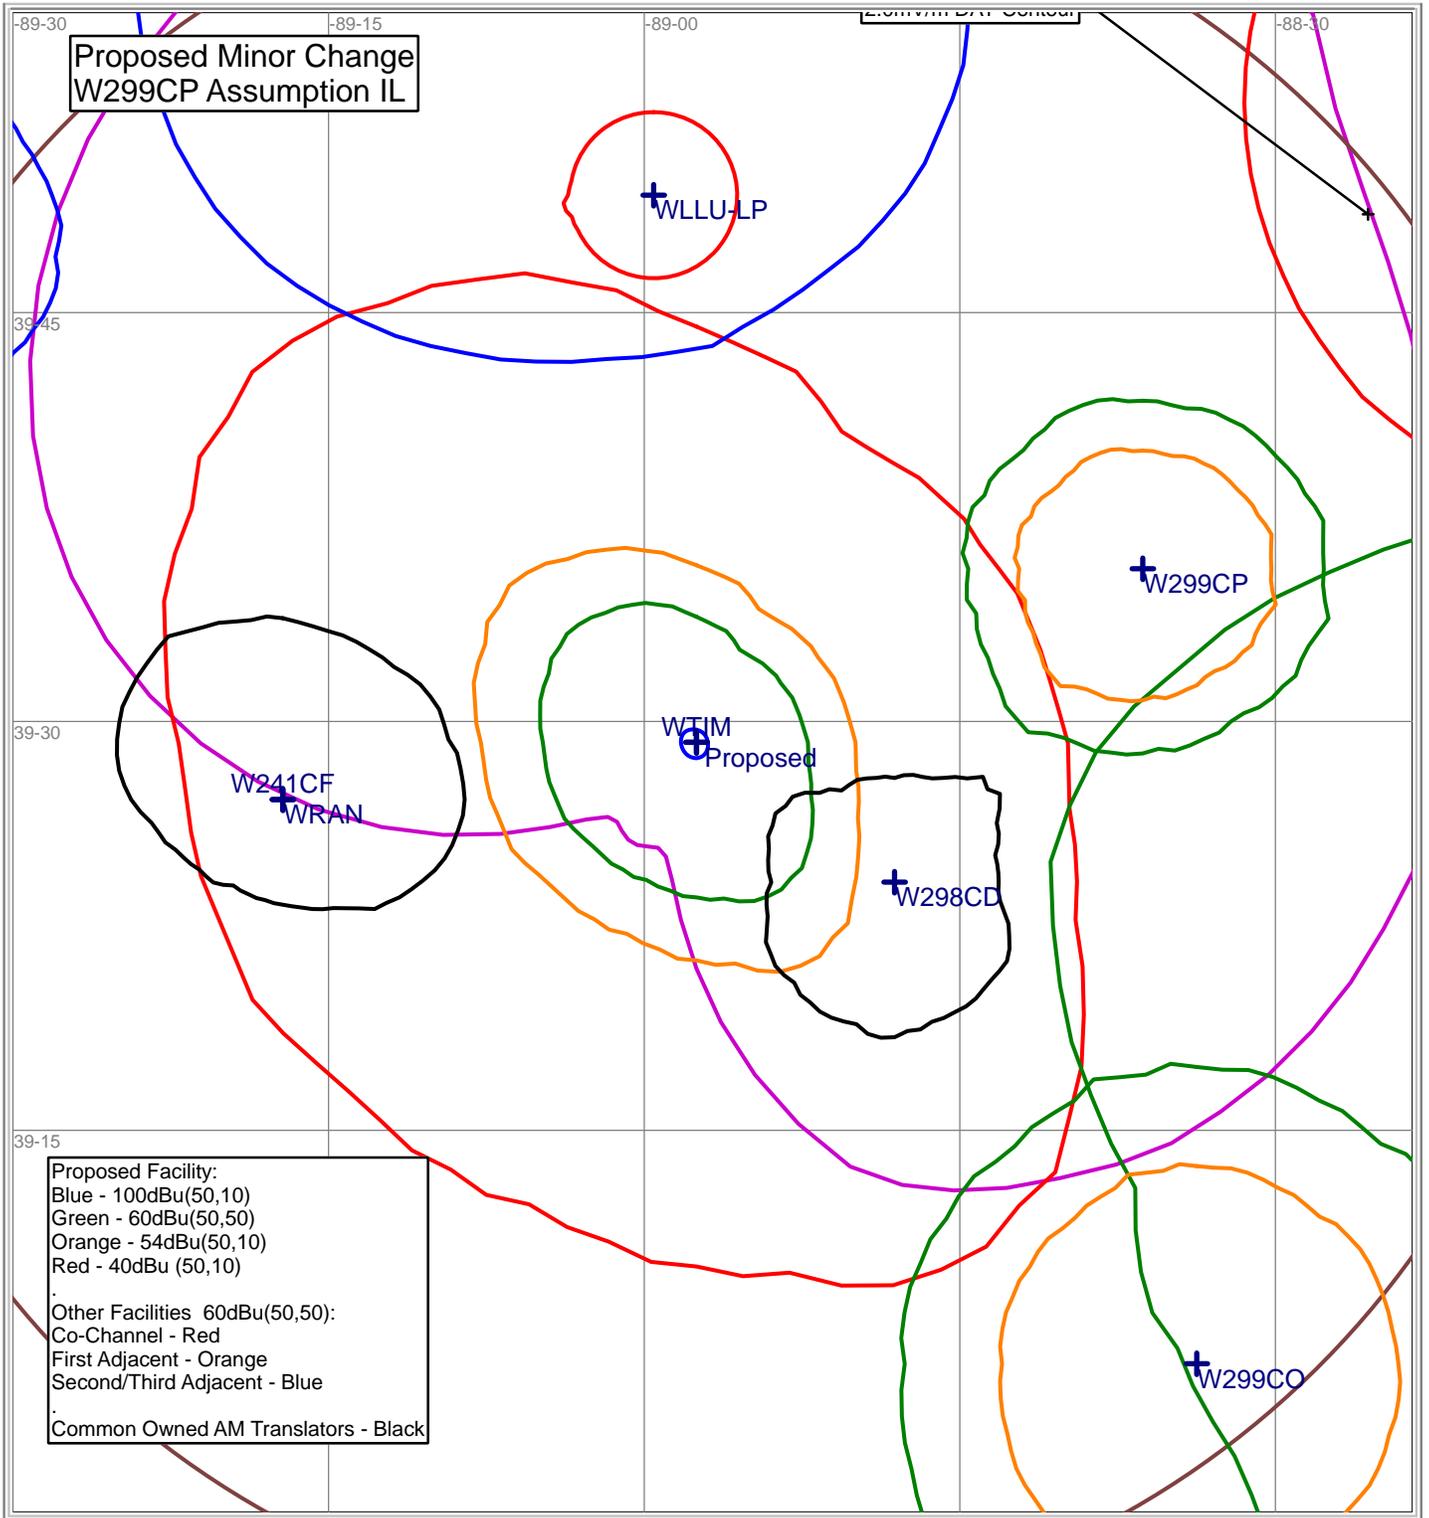

OTHER TRANSLATORS

The attached map shows the other signals associated with WTIM (AM) and demonstrated compliance with the overlap restrictions.

Respectfully,

A handwritten signature in black ink that reads 'Jim Turvaille'. The signature is fluid and cursive, with the first name 'Jim' and last name 'Turvaille' clearly legible.
