

Online Public File Exhibit

In the course of preparing the instant renewal application, licensee reviewed its online public file and noticed some discrepancies. An annual EEO report was migrated one day late from the paper public file to the online public file. In the past, licensee prepared its annual EEO reports on a calendar-year cycle and not according to its renewal date. Going forward, licensee will ensure its EEO reports reflect its activities for the 12 months from its license renewal date.
