

PREEMPTION EXPLANATION

On the station's fifth digital stream the children's programming was not preempted intentionally but instead it was an unforeseen technical malfunction that occurred. The programming was not run at its regularly scheduled time, but in order to make up the weekly quota, the programming was run at the same time but on a different day later that week. Unfortunately, we did not have the opportunity to notify viewers in the interval of time between when the programming was originally scheduled to run and when it eventually was rescheduled, and therefore the make-goods were not included in the calculation of the core programming hourly totals.
