

KEY PLUS BROADCASTING, LLC

Licensee of KXTD(AM), Wagoner, OK, Fac. ID 61985

"Violations During the Preceding License Term" Explanation

As detailed in BESTA-20201026AAE, Request for Further Extension of Existing Engineering STA, filed January 26, 2021 and accepted for filing on January 27, inadvertently, resulting from and complicated by disruption of station operation due to coronavirus 19 epidemic attacks on both licensee management and station staff, which necessitated the fumigation in October 2020, the previously granted KXTD STA (BSTA-20191106AAR, extended BESTA-20200601AAA) unintentionally expired on November 30, 2020.

Following discussion with Audio Division staff, the aforementioned further extension Request has been submitted, reporting the order of a new tower (to replace the tower destroyed in October 2019 by a tornado) and the reasonable expectation that KXTD will be operating with full licensed parameters by March or April 2021. It is anticipated that the further STA extension will be granted.

Aside from this rule violation, disclosed here in an abundance of caution, to the best knowledge and belief of Key Plus Broadcasting, LLC, there have been no violations of law or regulation during the previous license term.
