

KMDO Online Public File

All of the required documents have been placed in the online public file. One document, the issues/programs list for the third quarter of 2020, was posted nine days after the deadline, on October 22, 2020. This delay was caused by the then-recent departure of the employee who had been primarily responsible for maintaining the online public file, the resulting increase in workload for the remaining staff, and the inevitable distractions created by the intervening holiday weekend. Once the licensee realized that the posting had inadvertently been overlooked, the report was immediately added to the online public file.

While the issues/programs list for the first quarter of 2019 appears to have been posted only recently, it actually was uploaded to the online public file in a timely manner on April 5, 2019, at 3:14 p.m. Unfortunately, however, there appears to have been a technical issue with the posting which prevented that report from being seen in the online public file, and this problem was not noticed until preparatory work on this license renewal application was being done. At that point, the issues/programs list was again uploaded to the station's online public file. The same report also was uploaded on April 5, 2019, to the online public file of sister station KOMB, but did not suffer from a technical glitch and has remained so posted ever since.
