Request for Special Temporary Authority for Reduced Power Operation

Mission Broadcasting, Inc. ("Mission"), the licensee of KJBO-LP, Wichita Falls, Texas (the "Station"), hereby respectfully requests Special Temporary Authority to operate at a reduced power. Currently, the station is operating at 40% of its authorized power. The Station was forced to reduce its normal transmitter output power to 40% due to a transmitter failure. At present, Mission is awaiting the arrival of the necessary parts to complete the repairs. The parts are scheduled to arrive in the next several weeks, after which Mission will complete the repairs to the transmitter.

Accordingly, Mission hereby respectfully requests Special Temporary Authority to operate the KJBO-LP facility at reduced power until all repairs are complete.
