RF Exposure Statement
KRIV Houston, TX
Channel 26

The facility proposed in this application will operate with an effective radiated power (ERP) of 1,000 kW and a center of radiation 593 meters above ground level (AGL). An analysis of the radiation levels at 2 meters AGL indicate that the RF exposure level would be well below the allowable limit for an uncontrolled area and therefore meets the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
