LOW POWER TX INSTALALTION SERV.

GatesAir Standard Terms and Conditions and GatesAir standard statement of Work for Services Apply unless stated below.

The services include the labor and expenses for a GatesAir Service Representative to perform work at the customer site location.

The services include the complete installation of a quantity of (1) UAX-OP-1100 and a quantity of (1) UAXT-600-UC air-cooled transmitter systems into the same cabinet at (1) site location.

The services include the installation of RF components utilizing clip coupling components which may include soft soldering of system components as necessary on site. The customer will supply the appropriate acetylene and oxygen tanks if required if the customer does not have them already onsite. The GatesAir service representative will let the customer know if the equipment is needed.

The services included the complete system commissioning into a known good test load. The commissioning test will be performed utilizing GatesAir calibrated test equipment and standard commissioning test/documentation to GatesAir standard specifications.

The project will be considered and planned to be a start to finish project without delay from the installation of a quantity of (1) UAX-OP-1100 and a quantity of (1) UAXT-600-UC air-cooled transmitter systems in one transmitter cabinet to the testing and commissioning of the transmitter systems into a known good test load. Any customer delays or issues not the fault of GatesAir that delay the project once GatesAir personnel are on site will be charged to the customer at GatesAir Standard rates plus expenses which could also include return trips to the site to complete the installation and commissioning of the GatesAir transmitter system.

Project details and assumptions:

Assumes all GatesAir supplied equipment has been delivered to site prior to the arrival of the GatesAir Service Representative.

Assumes the customer has reviewed the GatesAir supplied product documentation and completed all site work associated to support the proper installation of all GatesAir supplied equipment and services that is not being provided by GatesAir. Please see the GatesAir Standard Work for Services document for information.

Assumes site access a minimum of (6) days a week and (10) hours per day depending on the scope of work for the project.

Assumes there is adequate space within the facilities to support the installation of all supplied equipment without the removal of any existing equipment.

Assumes appropriate electrical and HVAC work to support new equipment has been completed prior to the arrival of the GatesAir Service Representatives if needed for the installation.

Assumes the customer hired electrician shall be on site the day of the arrival of the GatesAir service representatives to the site to discuss equipment layout and final AC connection to each. Assumes all electrical work can be completed without delaying installation and commissioning of the equipment.

Any delays that a considered customer delays can be charged to the customer at GatesAir daily standard rates plus expenses.

GatesAir will not be allowed to work at the site while any tower work is being completed. It is the responsibility of the customer to inform GatesAir when the tower work will be performed in order to not interfere with the installation of the (1) UAX-OP-1100 and a quantity of (1) UAXT-600-UC air-cooled transmitter systems. If there is tower work being performed after the transmitter installation has started the additional time onsite will be charged back to the customer for the delays.

Assumes the customer qualified staff personnel shall be available to support GatesAir Service Representatives with appropriate site access and other needs as they arise. The GatesAir standard work schedule shall be (6) days a week and a maximum of (10) hours per day unless other arrangements are negotiated prior to project start dates and depending on the project and scope of work for the project.

Assumes the customer's antenna connection is within 12ft of location of the customers antenna feedline. Any additional line length required to be installed by the GatesAir service representatives will be charged to the customer at the GatesAir standard rates plus expenses.

No.	Product #	Qty	Net Unit Price	Ext. Price
<p>The services do not include repair of any existing transmitters or any other customer equipment that will be reused in final configuration. Repairs if required and agreed upon will be charged at the standard GatesAir daily rates plus expenses.</p> <p>The services do not include any de-installation or disposal of any RF or transmitter equipment that may have been removed during installation process. The customer shall be responsible for proper storage or disposal. If the customer wants GatesAir to dispose of any old equipment/transmitters, the customer will be quoted for that work separately from the original pricing through a change order.</p> <p>The services do not include Installation or Commissioning Services of any GatesAir supplied equipment as it relates to the tower, antenna, or transmission line from the tower to the building. Does not include any work beyond commissioning and operational testing of any GatesAir supplied remote control equipment at the site. The customer is responsible for configuration and connection to any link to studio that may exist.</p> <p>Please refer to the GatesAir Standard Terms and Conditions and the GatesAir Standard Statement of Work for Services for more information.</p> <p>Does not include any taxes, duties or VAT as related to services performed on-site.</p>
