

**FCC Form 303-S**  
**Online Public Inspection File Certification Exhibit**

In connection with diligence conducted to prepare this license renewal application, certain instances were discovered in which materials were delayed in being uploaded to the Station's online public inspection file.

As a result of administrative delays, the Station's issues/program list for the second quarter of 2015 was uploaded six days after the applicable deadline, and the issues/program list for the fourth quarter of 2015 was uploaded one day after the applicable deadline.

Because of personnel issues related to the individual who was responsible for maintaining the Station's online public inspection file at the time, the annual EEO report for 2015–2016 was uploaded on April 8, 2016. An amended annual EEO report for 2014–2015 was uploaded on November 9, 2015. However, based on a review of the records currently in Station's possession, the Station submits, on information and belief, that the original annual EEO report for 2014–2015 was timely filed.

The Station has confirmed that its online public inspection file currently contains an up-to-date list of contracts, in accordance with 47 C.F.R. § 73.3526(e)(5). In the course of preparing this Form 303-S, however, it was discovered that the list of contracts reflected an expired membership certification. Upon discovering this issue, the Station promptly corrected it and posted an up-to-date list of contracts to reflect its agreements.

The Station takes seriously its obligations under the FCC's rules, including its online public inspection file requirements. The Station is taking steps to ensure that materials are uploaded to the online public inspection file in accordance with applicable deadlines. In particular, the Station has reviewed the filing requirements of Section 73.3526(e) with outside counsel and Station staff, and it will follow protocols so that up-to-date materials are consistently uploaded by the relevant deadline.
