

WTHR
2021 License Renewal Application
Children's Programming Commercial Limits

During the 4th quarter of 2013, *Lazytown* inadvertently included a fleeting ½ second display of the URL for a web site (www.lazytown.com) that did not conform to the FCC's commercial limits rules for web site displays in children's programming. The display of the URL was a fleeting and isolated event. Because this incident occurred prior to Licensee's undergoing a long-form transfer of control in 2019, the incident does not affect Licensee's response to the Children's Programming Commercial Limitations certification, pursuant to FCC policy and the renewal application instructions.
