

KBWK Assignment  
Compliance with 73.7005(a)

KBWK went on the air July 9, 2018, and so it has not yet been on the air for four years. However, the applicant complies with 73.7005(a) due to the buyer qualifying for the same points and the station being sold for less than legitimate and prudent expenses.

KBWK was awarded points based on covering a larger service area and for diversity. The assignee, The Tropics Incorporated, will similarly qualify for the same points due to owning no overlapping broadcast stations.

The expenses for the station exceed the sales price of \$8,000.

Expenses include:

500 watt transmitter: \$3,500

Tower climbing: \$1,989.04

Antenna: \$800

Feedline and connectors: \$300

Two sets of Barix Instreamer & Exstreamers: \$1,251.32

Web Power Switch: \$183.12

Gorman Redlich EAS & CAP were already owned
