

Displacement Statement
KEVO-LD

Displacement Statement KEVO-LD had previously been granted a displacement to move to channel 19, and that construction permit has expired. Since then, K19MK-D has been awarded and has built on displacement channel 19. Channel 19 is therefore unusable due to 96.11 percent of the population coverage being interfered with according to TV Study. The applicant requests the ability to move to channel 16 instead.
