

## WMKI-LP Antenna Change.

Due to damage to the Circular Polarized CPS-100 4 bay antenna system, we will be changing out the antenna to a 2 bay vertical only polarization stacked dipole 2tda model.

The 2 bay vertical polarized 2tda antenna has a gain of 3 dBd, which will effectively change WMKI's current TPO from 114 Watts to 67 Watts to equal the authorized 100 Watt ERP.
