

Compliance with Mexican Spacing Requirements

The facility contemplated herein is located within 320 kilometers of the border between the United States and Mexico. Internationally, the proposed facility is considered to be class "AA". Under the terms of the 1992 Mexico-United States FM Broadcasting Agreement ("Agreement"), Class AA facilities must be separated from other stations which are separated by 0, 200, 400, or 600 kHz, and those separated by 10.6 or 10.8 mHz as follows:

The proposed facility is located approximately 205.4 kilometers from the Mexican border. The Mexican stations or allocations within 320 kilometers of the proposed operation are as follows:

Type	Ch/Class	City	Distance between sites	Distance Req'd by Agreement
Allocation	280C	Ciudad Acuna, CL	235.26 km	165 km

Therefore, the facility contemplated herein complies with the international agreement with Mexico
