

FCC Section 73.1690  
Modification of Transmission Systems

This KBPA license application proposes only to increase the effective radiated power from 11.0 kW to 50.0 kW. There is no change to the application coordinates, height above ground level or height above average terrain. There is no change to the transmit antenna. An exhibit is included demonstrating compliance with FCC Section 73.1675(a)(1)(ii). Therefore it is believed this KBPA license application is in compliance with FCC Section 73.1690
