

**Request for Special Temporary to Operate at Reduced Power**

Word of God Fellowship, Inc. (“WGF”), the licensee of low power television station WDTO-LD, Orlando, Florida, hereby respectfully requests Special Temporary Authority to operate at reduced power. During the commencement of service at the parameters of its displacement, WGF found that there was water in the transmission line and was forced to reduce power. As a result, WGF must replace the transmission line. At present, WGF has already begun working on the transmission line replacement and anticipates that the work will be completed soon. Once the repairs are complete, the station will resume full power operation.

Accordingly, WGF hereby respectfully requests Special Temporary Authority to continue operation at 1.2 kW ERP for a period of 180 days, or until such time as all repairs are complete.
