

Justification for Silent STA

With this application, the licensee is notifying the Commission of the current silent status of digital TV translator W10AL-D and respectfully requesting silent special temporary authority. On or around April 14, 2021, a channel 31 facility went live, and the channel 31 operations are currently preventing W10AL-D from receiving commonly-owned station WYFF's over-the-air channel 30 signal. In an effort to address this issue, WYFF has ordered a filter. The time frame for delivery and installation of the filter is approximately four weeks. W10AL-D is still operating; however, because it is unable to receive the WYFF signal, the translator is effectively silent and no programming is being broadcast.
